Importing into the database

File to import:

File may be compressed (gzip, bzip2, zip) or uncompressed. A compressed file's name must end in .[format].[compression].

Browse your computer: (Max: 40MiB)

Choose File No file chosen

You may also drag and drop a file on any page.

Character set of the file:

utf-8

Partial import:

☒ Allow the interruption of an import in case the script detects it is close to the PHP timeout limit.
This might be a good way to import large files, however it can break transactions.

Skip this number of queries (for SQL) starting from the first one:

0
